Re: S.H. Bell Company, 10218 South Avenue O
Monthly Data from FRM PM₁₀ Monitors

Dear Mr. Jones:

In accordance with the Paragraph 1.c of Stipulated Settlement and Final Consent Order, dated December 2, 2016, S.H. Bell Company (“S.H. Bell”) timely submits the filter-based PM₁₀ data for the month of August 2017 from the Federal Reference Method (“FRM”) filter-based PM₁₀ monitors located at the northern end of the S.H. Bell facility at location PS4 as set forth in the monitor siting plan that was approved by U.S. EPA on February 15, 2017 (the “August PM₁₀ FRM Data”).

As required by Paragraph 1.c of Stipulated Settlement and Final Consent Order, the August PM₁₀ FRM Data consists of both gravimetric analysis and determination of lead, arsenic, cadmium, chromium, manganese, nickel, and vanadium from the PM₁₀ FRM filters.

The August PM₁₀ FRM Data is being provided in an ASCII comma-delimited format and has undergone quality assurance and quality control. Should you have difficulty opening this file type, we suggest using Microsoft Excel and selecting “All Files (*.*)” for file type in the “OPEN” dialog box. Once the file is selected from the “OPEN” dialog box, the Import Wizard for delimited file format should appear. Ensure that “delimited” is the selected file type option and click next to continue on to the next step of the Import Wizard. In this next step, select “comma” as the delimiter and click finish.

Additionally, pursuant to a conference call with U.S. EPA on July 19, 2017, the gravimetric analysis is also provided in an excel spreadsheet and one ASCII comma-delimited file is being provided for the metals analysis.
